Career Objective

I am a quick learner with hands-on experience in real life in the field of Python and Django as a backend developer intern. I am looking up for the opportunities as an associate Backend intern to use and enhance my professional skills in the field.

Work Experiences

NAXA Pvt Ltd (October 2023- February 2024)
Backend Developer Intern

- Developed and maintained backend systems for various web applications using Python, Django, Django Rest Framework, and PostgreSQL
- Worked on NAXA website - Designed database schema and implemented API endpoints for dynamic content management using Django Rest Framework
- Contributed to GeoNAdir - Added Swagger API documentation and integrated the Pytest into the project
- Tasking Manager - Understanding functionality of this project and how Flask works and what it does in this project
- Built Field Monitoring Tool Manager (FMTM) - Understanding how Fast api works and what it does in this project
- Gained experience version controlling code with Git/GitHub, containerizing apps with Docker
- Participated in code reviews, design discussions, and collaborated closely with cross-functional teams including designers and GISdevelopers

College of Applied Business (July 2023- October 2023)
System Development Team Member

- Worked with MySQL to design schemas, write queries, and integrate databases with applications. Learned database optimization and administration.
- Used Jira software to track issues, create user stories, plan sprints, and monitor project progress. Became familiar with agile development practices.

- Collaborated with team members using Slack for communication, document sharing, and project management.
- Worked closely with lead developers and team members. Contributed through tasks like documentation, testing, and bug fixes. Gained understanding of full stack development.

Professional Skills

Programming Languages: I have experience programming in ***Python***, including object-oriented and functional programming. I have worked on python during my journey as a backend developer intern.

Web Development: I have developed responsive web applications using ***HTML, CSS,*** and ***JavaScript,*** especially in the ***Django*** web framework. I have skill in back-end web programming.

Version Control: I am proficient in using ***Git*** for version control and ***GitHub*** for remote repositories and collaboration.

Databases: I have working experience with relational databases like ***MySQL, SQLite, Postgres,*** and ***PostGIS***, as well as **Oracle DataBase**. I can design, optimize, and query databases.

Tools: I am skilled in using tools like ***Jira, Slack, Figma, Confluence***, and ***Docker***. I have used ***Postman*** for API testing and ***Swagger*** for API documentation.

Frameworks/Libraries: I have worked with Python web frameworks like ***Django Rest Framework, FastAPI,*** and *Flask*. I have used ***Celery*** for task queueing and ***Redis*** for caching.

ORM/ODM: I have experience using ***SQLAlchemy*** as an ORM for Python, and ***Pydantic*** for data validation.

Testing: I have experience writing unit tests using the ***Pytest*** framework in Python.

Documentation: I have used ***Sphinx-apidoc*** to generate documentation for Python APIs.

Education Qualification

Course	Institution	Board	Year of passing	Score
BSc. CSIT	College of Applied Business and Technology, Chabhail, Kathmandu.	Tribhuvan University	Final Year Student (expected 2024)	TBD
High School	NIST College, Kathmandu	NEB	2019 A. D.	3.18 CGPA

College Projects

– LUGAFATO: FASHION E-COMMERCE:

LugaFato is an online clothing store. We created this site by Django, a Python framework, ensuring a seamless and efficient backend experience. Frontend design is done using Bootstrap, CSS, and HTML with SQLITE in the database.

https://github.com/pawansapkota100/LugaFato-Fashion-e-commerce

–PERSONAL PORTFOLIO WEBSITE:

With basic HTML, CSS, and JavaScript, I create an engaging and visually appealing platform that reflects my unique personality and professional aspirations.

https://github.com/pawansapkota100/personal_portfolio_website

–FACIAL RECOGNITION SYSTEM:

Developed a facial recognition system during the third semester of college using Python and the OpenCV module. The project aimed to identify and authenticate individuals based on facial features, with the computer vision techniques.

– ESSAYMETRICS- AN AUTOMATED ESSAY SCORING SYSTEM:

I built EssayMetrics as a part of the final year college project. EssayMetrics features an LSTM neural network trained on a dataset of thousands of essay examples and predicts the score of the provided essay accordingly.

Certifications/Scholarships/Achievements

- Certified on PYTHON FOR EVERYBODY (University of Michigan - School of Information, 2020)
- Certified on WEB APPLICATION TECHNOLOGIES AND DJANGO(University of Michigan - School of Information, 2023)
- Member of CSIT Association of Nepal
- College of Applied Business and Technology Student Academic Excellence Scholarship Winner (Three Times)
- Certified on Advanced Java Course (Sikaai IT, 2023)
- Participant of AIFIVERSE Techies Meetup, 2022
- Volunteer Work at NUS MUN Nepal, 2016
